

Cruizer II™ and Cruizer II™ RTK Software Update Details

Version: Jobs Blanker
Release Date: 07/02/15

What is the Jobs Blanker?

The "Jobs Blanker" is a software update that will initiate a program and will delete all job files off of the Cruizer (II) consoles. This will not update the Cruizer (II) console, but rather delete jobs that cannot otherwise be deleted through regular file maintenance. This can be used if getting memory full errors or if there are jobs that cannot be deleted through regular file maintenance.

Note: This will work on all Cruizer consoles. This is not change the current software version that is programmed into the console.

Download and Installation Instructions

How to use the Cruizer Jobs Blanker

1. Download attachment and extract to the root directory of the USB drive. It should resemble the image below.

2. Power up the Cruizer (II) console and insert the USB drive
3. Press the "Tools" icon and then select the "Updates" option on the next page
4. Select "Updates" under the Feature box on the left side.
5. Select the "Memory_Flush" update in the center box.
6. Press the green Play button on the bottom.
7. After it is complete, restart console.
