

SmarTrax™ and SmarTrax™ RTK Software Update Details

Version: 3.0A

Release Date: 06/02/09

This version is only for valves that have not been updated:

- 334-0003-056
- 334-0003-062
- 334-0003-064
- 334-0003-066

If valves haven't been updated, version 4.2 will not work with the non-updated valves.

Download and Installation Instructions

Note: SmarTrax Update Cable 115-0171-484 or 115-0171-692 must be used to do SmarTrax controller updates. This cable does not come standard with SmarTrax systems.

Assisted steering in Last Pass, Pivot and Fixed Curve modes when used with Envizio Plus (3.0 software) and Viper Pro (2.51A Software).

NOTE: The baud rate has been changed to 115,200 in order to facilitate these new steering modes. The baud rate will need to be manually changed back to 38,400 to work with older systems.

NOTE: SmarTrax v4.2 update is not recommended for use with QuickTrax.

Release Notes

Improved steering on front-mount boom machines.

Enhanced articulated tractor steering performance.
