NEW JOB IN NEW FIELD

Select the **New Field** button. Every job on the CR7™ will be associated with a field. Name your field and change the job name to something more specific. Select the **Next** button.

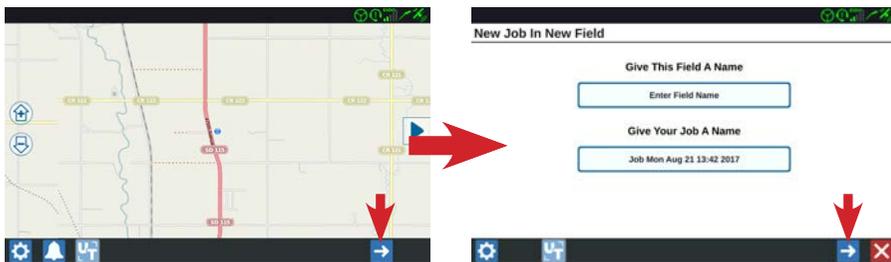

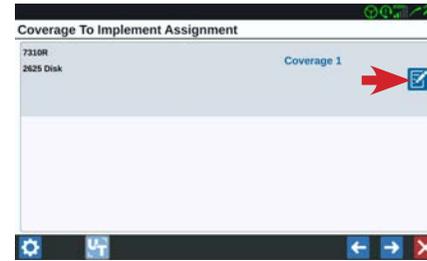

## COVERAGE TO IMPLEMENT ASSIGNMENT

If you are not doing product control, select the **Next** button to start your job.
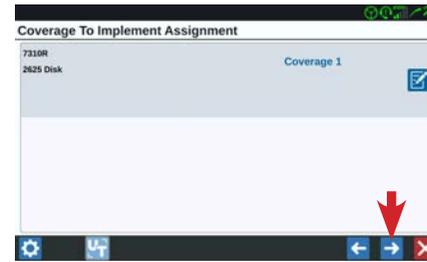

If you are doing product control and would like to add product information to your report, select the **Edit** button to change your job details.

You can enter a product name, granular mixture, or any description by selecting the **Product** drop down and choosing a previous product name or selecting **<Add a product>** to create a new one. When finished, select the **Okay** button.

If you are doing product control with a Raven serial console (SCS 44x/66x), please see the CR7™ Serial Console guide for more information on setting up the application units.

CR7™ JOB SETUP

PREVIOUS FIELD (NEW JOB)
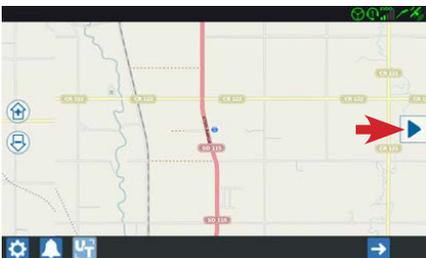

Select the **Previous Field** button.
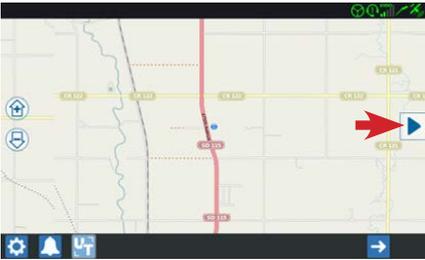

Select the field you would like to start a new job in. Select the **New Job** button. Rename your job to something more specific and select the **Next** button. See the previous *Coverage To Implement Assignment* section for more information about the page that follows.
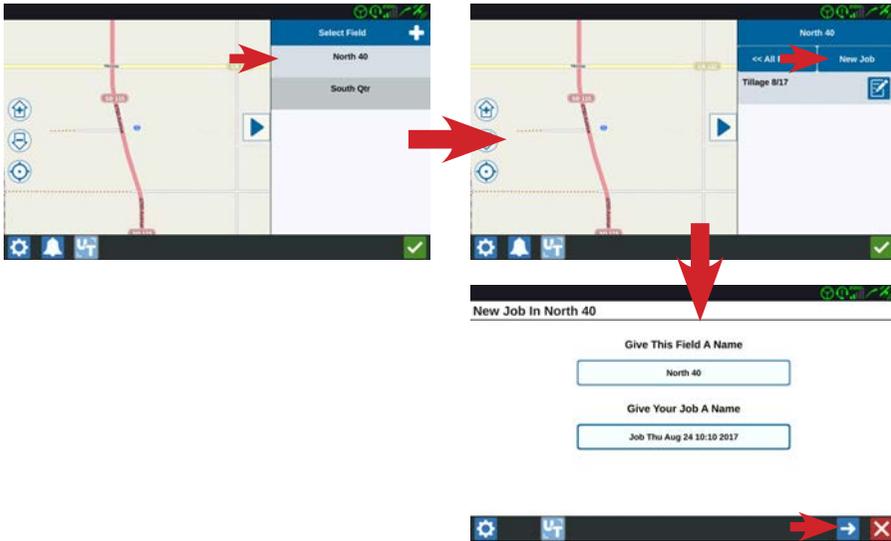

PREVIOUS FIELD (PREVIOUS JOB)

Select the **Previous Field** button.

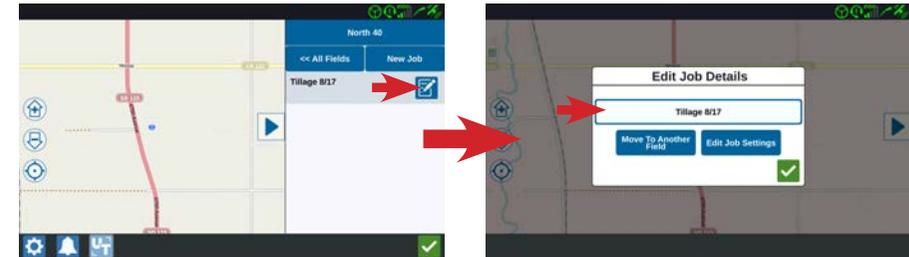

CR7™ JOB SETUP - PAGE 2

PREVIOUS FIELD (PREVIOUS JOB) CONTINUED

Select your previous field and then select the job you want to continue.

EDIT JOB DETAILS

You can change the name of your job by selecting the **Edit** button and then selecting the field name.

You can also change the *Grower* or *Farm* or *Field* the job is associated with. Select the **Move To Another Field** button to edit these details. The *Grower*, *Farm*, or *Field* will have to be entered first before completing this re-assignment. You can add these details in **File Manager**.

If you are doing product control, you can select the **Edit Job Settings** button and change the *Default Rate*, Unit of Measurement, and add/remove a prescription map for this specific job.
