

UNLOCKS

You can temporarily or permanently unlock variable rating for a single product or multiple products, universal terminal functionality, or task controller functionality on your CR7™. To check the status of your features, select the **Software Update** button and then the **Features** button.

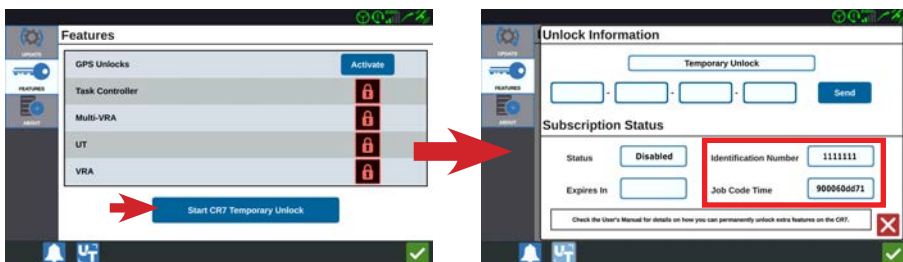

Your brand new CR7™ is temporarily unlocked for all features. Select the **Start CR7 Temporary Unlock** button to activate your trial period. You will have 20 hours of powered-on time to test the features you are interested in.

EXTEND TRIAL PERIOD

After 20 hours of powered-on time, your temporary features will disable. If you need to extend this trial period, you can request a temporary unlock code. Your local Raven dealer will be able to assist you with obtaining additional time. You will need to provide the *Identification Number* and *Job Code Time* of your CR7™. Select the **Start CR7 Temporary Unlock** button to retrieve this information.

You can also call Raven technical service with this information and obtain a temporary unlock code.

CR7™ UNLOCKS

ENTER TEMPORARY UNLOCK

Enter your temporary unlock code (*not case sensitive*) and select the **Send** button.

ENTER PERMANENT UNLOCK

Permanent unlocks are loaded to your CR7™ with a USB drive. There is not a code to enter like there is for a temporary unlock! Copy your unlock file to the main **Raven** folder on your USB drive. **Never rename the unlock file.** If you do not have a **Raven** folder, you will need to create one. Insert your USB drive into your CR7™ and select the **File Manager** button. Select **USB** as your source, then **Unlocks**, and then your unlock file. Select the **Copy** button. When completed, restart your CR7™.
