START NEW JOB SETUP
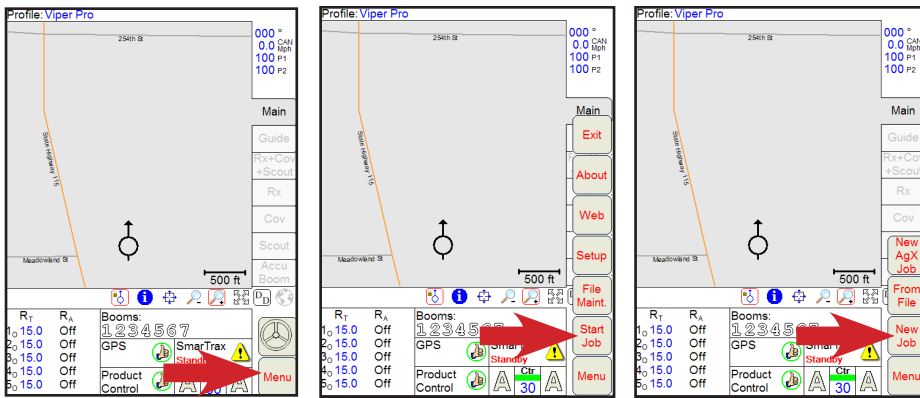

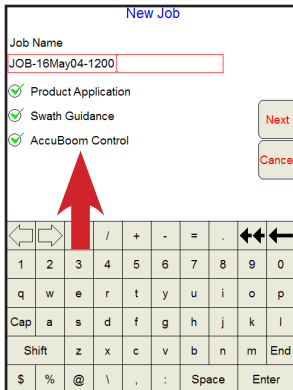

Select the **Menu, Start Job,** then **New Job** buttons.

NAME THE JOB & ENABLE JOB FEATURES (OPTIONAL)

Select the **Delete** ← or **Delete All** ←← button to rename the job.

Select job features to be activated. All three options are selected for typical applications. Select the **Next** button when finished.
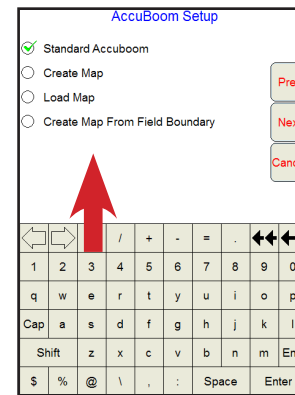

CHOOSE SWATH PATTERN

Select either **Straight AB**, **Contour Fixed**, **Pivot**, or **Last Pass** for the initial swath pattern. A different swath pattern may be selected later in the job screen. Select the **Next** button when finished.

Initial Swath Pattern	Switch To Pattern	Switch Back To Pattern
Straight AB, Contour Fixed, or Pivot	**Last Pass**	**Straight AB**
Last Pass	**Straight AB**	**Last Pass**

ENABLE ACCUBOOM (IF INSTALLED)

AccuBoom Control must be selected on the first job set up page for this option to show. Select the **Next** button when finished.

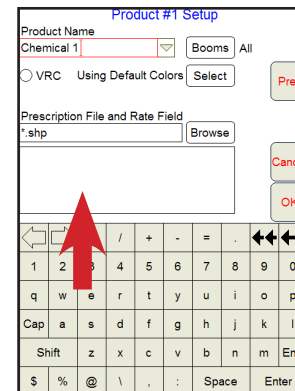

Standard AccuBoom	Apply in unapplied areas; do not apply in previously applied areas
Create Map	Ability to record and save an application map (spray/no spray zones, field boundary with buffer zone, etc.)
Load Map	Load a previously recorded application map
Create Map from Field Boundary	Load a previously recorded field boundary and add a buffer zone

PRODUCT SELECTION

Select the number of products being used if a multi-product setup. If doing a granular application, can **Enable Product Chaining**. Select the **Next** button.

PRODUCT SETUP

Add a *Product Name* or choose a previous one from the drop down list. If doing variable rating then select **VRC**. Change the map template for rate zone colors by the **Select** button for *Using Default Colors* (optional). **Browse** for the prescription map that has been loaded into memory. Select the rate column (Rate, DAP, UREA, for example) from the .dbf file of the prescription map. Select the **Next** button to set up the other products in a multi-product setup. Select the **OK** button when finished to start the job. Place product control into *Manual* or *Automatic* from the main run screen.
