

CRX SOFTWARE UPDATE INSTRUCTIONS

FOR SOFTWARE VERSION 2.4.X

SOFTWARE

Check for CRX software updates via Slingshot:

1. Press Software Update on the CRX Settings page. The Update page will open.
2. If there is an update available via Slingshot it will be listed under the Slingshot Link column. To learn more information about what is included in the update, read the release notes.
3. To install the update, press download. The update will download to the CRX. After the CRX update has downloaded, the Download button will change to Install. Press Install to install the software update.

DOWNLOADING A CRX UPDATE TO USB

To locate and download a CRX software update to a USB stick:

1. On a computer, enter <http://portal.ravenprecision.com> into the address bar.
2. Press Enter
3. Click Product Documentation
4. Click CRX
5. Navigate to the dropdown
6. Select the desired Software
7. Select Save As from the Save dropdown
8. Select the desktop as the desired save location
9. Press Save
10. Create a folder on the USB drive named "Raven" with a folder named "Updates" inside it
11. Place the software update in the folder "Updates" created in step 10

Note: Do not "unzip" or extract the software update file before copying to the Updates folder.

INSTALLING CRX UPDATES VIA USB

To apply a software update to the CRX device:

1. Insert the USB flash drive with the CRX update in the required folder into the CRX device.
2. Once the update file is detected on the USB drive, select the desired update from the USB drop down list then press Install.
