RTV-40 Tracker Installation

1. Locate The Diagnostics Port

- Usually located under the steering console (see the asterisks (*) on the diagram to the left for potential Diagnostic Port locations)

2. Cable Installation

- Y-Cable Installation
 - Remove the vehicle's existing Diagnostics Port from its mount
 - Connect the vehicle's Diagnostics Port to Diagnostic Plug of the Y-Cable
 - Mount the Replacement Diagnostic Port of the Y-Cable to where the original vehicle's Diagnostic Port was located to allow further diagnostics without interruption of service
- Direct Cable Installation
 - Connect the Diagnostic Plug of the Direct Cable into vehicle's Diagnostic Port

3. Connect Your Device

- Plug in the Device Port from your cable to the Raven Device
 - Carefully align the pins, and push the attachment straight into the device until you hear it lock in place
 - Do not push the attachment in at an angle or use too much force

MORE →

4. Placement & Cable Management

- Run the cables and device to the desired location in the vehicle
 - Directly under the dash is preferred
 - Secure the cables and device to ensure safe vehicle and device operation

5. Verify Device Installation

- Turn the vehicle's engine to "On"
- Wait for the three LEDs to be solid, if they are flashing or not lighting up, the device is not connected
 - Blue LED — Cellular service
 - Green LED — Engine data
 - Orange LED — GPS service
