CR7™ and CR12™ Software Release Notes

Version 23.3.0.81

Enhancements

- General UI/UX improvements
- Improved AutoTurn intuitiveness and stability
- Added 'Do not show again' option to the nudge management popup
- Added support for offset implements to AutoTurn
- Added elevation to the job file export
- Improved the altimeter widget with support for sea-level elevation

Defects Resolved

- Fixed issue where the AutoTurn warning symbol would be shown too often
- Fixed issue where the rate would wrongfully be 0 at the start of the job
- Fixed issue where coverage was drawn incorrectly when using crop registration
- Fixed issue where the swath number was not displaying correctly
- Fixed issue where saving/discarding a nudged line could result in a steering action
