IMPORTANT SAFETY INFORMATION

NOTICE

Read this manual and the operation and safety instructions included with your implement and/or controller carefully before installing the SmarTrax™ system.

- Follow all safety information presented within this manual.
- If you require assistance with any portion of the installation or service of your Raven equipment, contact your local Raven dealer for support.
- Follow all safety labels affixed to the SmarTrax system components. Be sure to keep safety labels in good condition and replace any missing or damaged labels. To obtain replacements for missing or damaged safety labels, contact your local Raven dealer.

When operating the machine after installing SmarTrax, observe the following safety measures:

- Be alert and aware of surroundings.
- Do not operate SmarTrax or any agricultural equipment while under the influence of alcohol or an illegal substance.
- Remain in the operator's position in the machine at all times when SmarTrax is engaged.
- Disable SmarTrax when exiting the operator's seat and machine.
- Do not drive the machine with SmarTrax enabled on any public road.
- Determine and remain a safe working distance from other individuals. The operator is responsible for disabling SmarTrax when the safe working distance has diminished.
- Ensure SmarTrax is disabled prior to starting any maintenance work on SmarTrax or the machine.

WARNING

- When starting the machine for the first time after installing SmarTrax, be sure that all persons stand clear in case a hose has not been properly tightened.
- The machine must remain stationary and switched off during SmarTrax installation or maintenance.

CAUTION

INSTRUCTIONS FOR WIRE ROUTING

The word “harness” is used to mean all electrical leads and cables, bundled and unbundled. When installing harness, secure it at least every 30 cm (12in) to the frame. Follow existing harness as much as possible and use these guidelines:

Harness should not contact or be attached to:

- Lines and hoses with high vibration forces or pressure spikes
- Lines and hoses carrying hot fluids beyond harness component specifications

Avoid contact with any sharp edge or abrading surfaces such as, but not limited to:

- Sheared or flame cut edges
- Edges of machined surfaces
- Fastener threads or cap screw heads
- Ends of adjustable hose clamps
- Wire exiting conduit without protection, either ends or side of conduit
- Hose and tube fittings

Routing should not allow harnesses to:

- Hang below the unit
- Have the potential to become damaged due to exposure to the exterior environment. (i.e. tree limbs, debris, attachments)
- Be placed in areas of or in contact with machine components which develop temperatures higher than the temperature rating of harness components
- Wiring should be protected or shielded if it needs to route near hot temperatures beyond harness component specifications

Harnessing should not have sharp bends

Allow sufficient clearance from machine component operational zones such as:

- Drive shafts, universal joints and hitches (i.e. 3-point hitch)
- Pulleys, gears, sprockets
- Deflection and backlash of belts and chains
- Adjustment zones of adjustable brackets
- Changes of position in steering and suspension systems
- Moving linkages, cylinders, articulation joints, attachments
- Ground engaging components

For harness sections that move during machine operation:

- Allow sufficient length for free movement without interference to prevent: pulling, pinching, catching or rubbing, especially in articulation and pivot points
- Clamp harnesses securely to force controlled movement to occur in the desired harness section
- Avoid sharp twisting or flexing of harnesses in short distances
- Connectors and splices should not be located in harness sections that move

Protect harnesses from:

- Foreign objects such as rocks that may fall or be thrown by the unit
- Buildup of dirt, mud, snow, ice, submersion in water and oil
- Tree limbs, brush and debris
- Damage where service personnel or operators might step or use as a grab bar
- Damage when passing through metal structures

IMPORTANT: Avoid directly spraying electrical components and connections with high pressure water. High pressure water sprays can penetrate seals and cause electrical components to corrode or otherwise become damaged. When performing maintenance:

- Inspect all electrical components and connections for damage or corrosion. Repair or replace components, connections, or cable as necessary.
- Ensure connections are clean, dry, and not damaged. Repair or replace components, connections, or cable as necessary.
- Clean components or connections using low pressure water, pressurized air, or an aerosol electrical component cleaning agent.
- Remove visible surface water from components, connections, or seals using pressurized air or an aerosol electrical component cleaning agent. Allow components to dry completely before reconnecting cables.

INSTRUCTIONS FOR HOSE ROUTING

The word "hose" is used to mean all flexible fluid carrying components. Follow existing hoses as much as possible and use these guidelines:

Hoses should not contact or be attached to:

- Components with high vibration forces
- Components carrying hot fluids beyond component specifications

Avoid contact with any sharp edge or abrading surfaces such as, but not limited to:

- Sheared or flame cut edges
- Edges of machined surfaces
- Fastener threads or cap screw heads
- Ends of adjustable hose clamps

Routing should not allow hoses to:

- Hang below the unit
- Have the potential to become damaged due to exposure to the exterior environment. (i.e. tree limbs, debris, attachments)
- Be placed in areas of or in contact with machine components which develop temperatures higher than the temperature rating of hose components
- Hoses should be protected or shielded if it needs to route near hot temperatures beyond hose component specifications

Hoses should not have sharp bends

Allow sufficient clearance from machine component operational zones such as:

- Drive shafts, universal joints and hitches (i.e. 3-point hitch)
- Pulleys, gears, sprockets
- Deflection and backlash of belts and chains
- Adjustment zones of adjustable brackets
- Changes of position in steering and suspension systems
- Moving linkages, cylinders, articulation joints, attachments
- Ground engaging components

For hose sections that move during machine operation:

- Allow sufficient length for free movement without interference to prevent: pulling, pinching, catching or rubbing, especially in articulation and pivot points
- Clamp hoses securely to force controlled movement to occur in the desired hose section
- Avoid sharp twisting or flexing of hoses in short distances

Protect hoses from:

- Foreign objects such as rocks that may fall or be thrown by the unit
 - Buildup of dirt, mud, snow, ice, submersion in water and oil
 - Tree limbs, brush and debris
 - Damage where service personnel or operators might step or use as a grab bar
 - Damage when passing through metal structures
 - High pressure wash
-

CHAPTER

INTRODUCTION

2

Congratulations on your purchase of the SmarTrax system! This system is designed to provide cutting-edge, hands-free steering of the machine via Global Positioning System (GPS) coordinates.

This manual applies to the following machines:

MAKE: Case IH
MODEL: Patriot 4440
YEAR: 2017 and Newer

PREPARING FOR INSTALLATION

Before installing the SmarTrax system, park the machine where the ground is level, clean, and dry. Turn off the machine and leave it turned off for the duration of the installation process. Bleed pressure from the hydraulic system by loosening the hydraulic fittings slowly, where applicable.

During the installation process, follow good safety practices. Be sure to carefully read the instructions in this manual as you complete the installation process.

RECOMMENDATIONS

Raven Industries recommends the following best practices when installing or operating the SmarTrax system for the first time, at the start of the season, or when moving the SmarTrax system to another machine:

- Install the GPS antenna in the recommended location. Refer to the following table for the machine-specific antenna mounting location.

NOTE: If your machine is not listed, install the antenna on the front-center of the cab..

TABLE 1.

Machine Preset	Antenna X Position (left to right)	Antenna Y Position (from the rear wheel axle to the antenna position on the cab)	Antenna Z Position (ground to top of antenna)
Case IH SPX4260 and 44x0	Centered	14.5 ft./4.42 m	12 ft./3.66 m

- Ensure the machine's hydraulic filters have been recently changed and there are no issues with the machine's hydraulic system (e.g., pump issues, faulty hydraulic motors, fine metal deposits in the hydraulic hoses, etc.).
- Ensure the machine's hydraulic system is using fresh oil and debris is flushed from the hydraulic hoses, valves, and filters.

Raven Industries recommends the following best practices when installing the SmarTrax system:

- Use part numbers to identify the parts.
- Do not remove the plastic wrap from a part until it is necessary for installation.
- Do not remove plastic caps from a part until it is necessary for installation.

POINT OF REFERENCE

The instructions in this manual assume that you are standing behind the machine, looking toward the cab.

UPDATES

Software and manual updates are available on the Raven Applied Technology website:

<http://www.ravenhelp.com>

At Raven Industries, we strive to make your experience with our products as rewarding as possible. One way to improve this experience is to provide us with feedback on this manual.

Your feedback will help shape the future of our product documentation and the overall service we provide. We appreciate the opportunity to see ourselves as our customers see us and are eager to gather ideas on how we have been helping or how we can do better.

To serve you best, please send an email with the following information to

techwriting@ravenind.com

- Case IH Patriot 4440, Non-Steer Ready MY 17 and Newer SmarTrax Installation Manual
- P/N 016-5032-043 Rev. A
- Any comments or feedback (include chapter or page numbers if applicable).
- Let us know how long have you been using this or other Raven products.

We will not share your email or any information you provide with anyone else. Your feedback is valued and extremely important to us.

Thank you for your time.

KIT CONTENTS

This section contains a list of the components that are included in the SmarTrax kit. Before beginning the SmarTrax installation, compare the items in the kit with the components on this list. If you have questions about the kit, contact your Raven dealer.

NOTE: The SmarTrax node (P/N 063-0173-228 is sold separately. Contact your local Raven dealer for ordering information.

CHAPTER

3

HYDRAULIC SYSTEM INSTALLATION

WARNING

Hydraulics are under pressure. Care should always be taken with a system that has been pressurized.

Before beginning the SmarTrax hydraulic installation, turn off the machine and relieve pressure by turning the steering wheel left and right.

When disconnecting or purging hydraulic hoses, be aware that the hydraulic fluid within the machine's system may be extremely hot and under high pressure.

Tampering with hydraulic valves may cause serious injury or death, and will void the warranty.

CAUTION

When installing SmarTrax hydraulics or performing diagnostics, maintenance, or routine service, ensure precautions are taken to prevent any foreign material from being introduced into the machine's hydraulic system.

Objects or materials that are able to bypass the machine's hydraulic filtration system will reduce performance and possibly damage the SmarTrax hydraulic valve.

	NOTICE
<p>The appearance of the SmarTrax hydraulic valve may vary slightly from the images contained in this manual. However, the fittings, hose connections, and cable connections remain the same.</p>	

INSTALL FITTINGS ON THE SMARTRAX VALVE

Before mounting the SmarTrax valve (P/N 334-0003-088) on the machine, install the proper fittings in the valve. This prepares the valve for installation and simplifies the hose connection process later in the procedure.

FIGURE 1. Fittings Installed on the SmarTrax Valve

TABLE 1.

Fitting	Part Number	Port
Fitting - -6 SAE O-Ring Plug	333-0012-104	LSPV, LS STEER
Fitting - -4 SAE O-Ring Plug	333-0012-051	PS
Fitting - -6 ORFS (M) to -8 SAE O-Ring (M) Straight Adapter	333-0012-199	P, T
Fitting - -6 ORFS (M) to -10 SAE O-Ring (M) Straight Adapter	333-0012-233	A, B

INSTALL FITTINGS ON THE FLOW SWITCH

FIGURE 2. Fittings Installed on the Flow Switch

1. Install a -6 ORFS (M) to -6 SAE O-ring (M) straight adapter fitting (P/N 333-0012-084) in Ports A2 and B3 of the flow switch (P/N 334-003-085).
2. Install the pressure transducers in Ports A1 and B1 of the flow switch.

MOUNT THE SMARTRAX VALVE

INSTALL THE SMARTRAX VALVE MOUNTING BRACKET

FIGURE 3. Valve Mounting Location

1. Remove the bolts used to secure the machine's radar bracket (beneath the cab).

FIGURE 4. Mounting Plate Installed

2. Mount the hydraulic valve mounting bracket (P/N 107-0171-705) to the machine's radar bracket using the bolts removed in step 1.

MOUNT THE SMARTRAX VALVE

1. Mount the SmarTrax valve (P/N 334-0003-088) to the valve mounting bracket (P/N 107-0171-705) using four 5/16" hex bolts (P/N 311-0052-104) and four 5/16" lock washers (P/N 313-1000-019).
2. Mount the flow switch (P/N 334-0003-085) to the valve mounting bracket using two 1/4"-20 x 2" screws (P/N 311-0050-109), two 1/4" flat washers (P/N 313-2300-009), two 1/4" split lock washers (P/N 313-1000-016) and two 1/4"-20 hex nuts (P/N 312-1001-074).

NOTE: Changing the fitting and transducer locations on the flow switch to mirror Figure 1 on page 14 will keep hoses and cables from hanging below the frame rail of the machine where they could be damaged.

INSTALL THE PRESSURE HOSE

1. Locate the machine's steel pressure line.

NOTE: The pressure line runs on the inside of the frame from the rear of the machine. The line bends 45° just before the hydraulic hose connection. Trace it to the P port on the steering orbital if necessary.

2. Disconnect the machine's pressure hose from the steel pressure line.

FIGURE 5. Pressure Hose Installed

3. Install a -6 ORFS M/M/F swivel run tee adapter fitting (P/N 333-0012-069) on the steel pressure line.
4. Connect the machine's pressure hose to the opposite end of the installed tee fitting.
5. Install the 90° end of the supplied hydraulic hose (P/N 214-1000-657) on the 90° end of the installed tee fitting.
6. Connect the straight end of the installed hydraulic hose to Port P of the SmarTrax valve.

INSTALL THE TANK HOSE

1. Locate the machine's steel tank line.

NOTE: The pressure line runs on the inside of the frame from the rear of the machine. Trace it to the T port on the steering orbital if necessary.

2. Disconnect the machine's tank hose from the steel tank line.

FIGURE 6. Tank Hose Installed

3. Install a -8 ORFS M/M/F swivel run tee adapter fitting (P/N 333-0012-028) on the machine's steel tank line.
4. Connect the machine's tank hose to the opposite end of the installed tee fitting.
5. Install the -8 end of the supplied hydraulic hose (P/N 214-1000-658) on the 90° end of the installed tee fitting.
6. Connect the other end of the installed hydraulic hose to Port T of the SmarTrax valve.

INSTALL THE LEFT AND RIGHT STEERING HOSES

1. Locate and disconnect the machine's left steering hose from the left steering cylinder.

NOTE: The left steering hose is connected to the fitting located closest to the center of the machine.

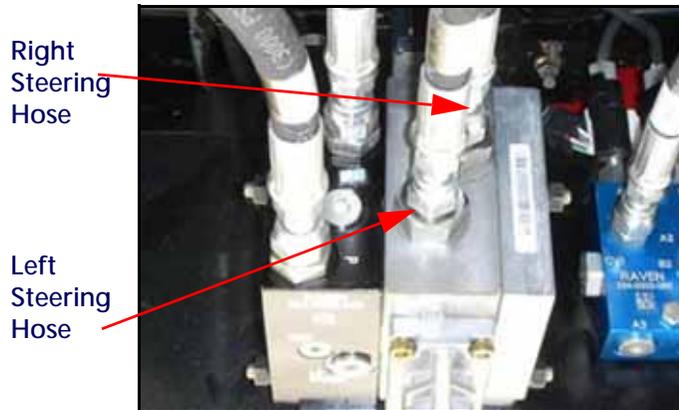

2. Route and connect the left steering hose to the Port A2 of the installed flow switch (P/N 334-0003-085).

FIGURE 7. Installed Left Steering Hose

3. Install a -6 ORFS M/M/F swivel run tee adapter fitting (P/N 333-0012-069) on the open steering cylinder port.
4. Install the straight end of the supplied hydraulic hose (P/N 214-1000-318) on the opposite end of the installed tee fitting.
5. Connect the 90° end of the installed hydraulic hose to the fitting installed in Port B3 of the installed flow switch.
6. Install the 90° end of the supplied hydraulic hose (P/N 214-1000-318) on the 90° end of the installed tee fitting.
7. Connect the straight end of the installed hydraulic hose to Port A of the SmarTrax valve.

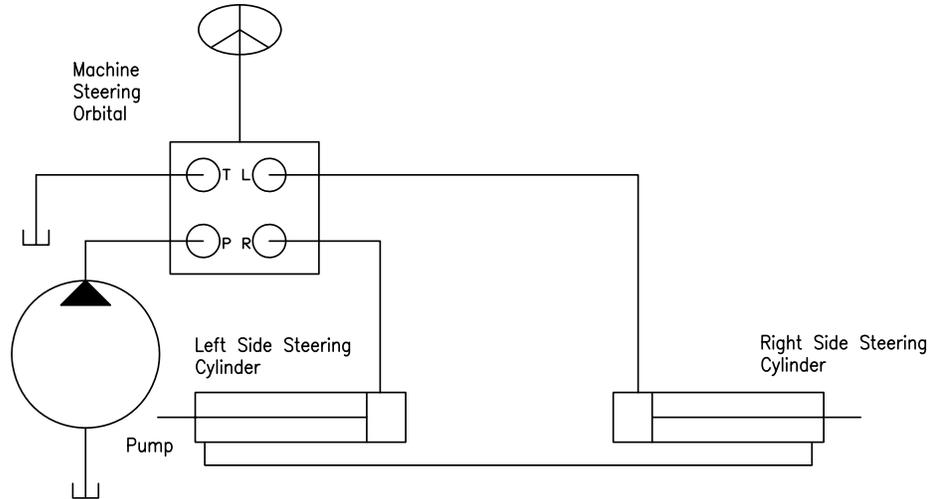

FIGURE 8. Installed Right Steering Hose

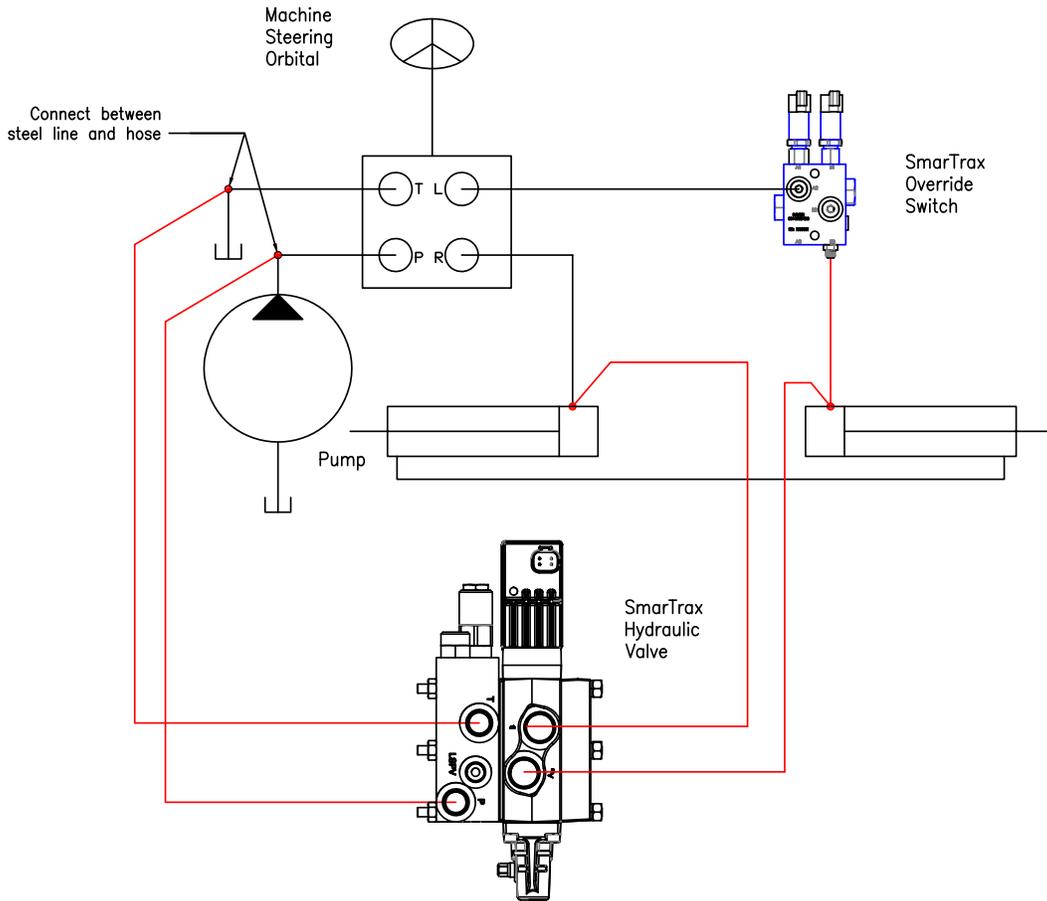

8. Locate and disconnect the machine's right steering hose from the right steering cylinder.
9. Install a -6 ORFS M/M/F swivel run tee adapter fitting (P/N 333-0012-069) in the open steering cylinder port.
10. Connect the machine's right steering hose to the opposite end of the installed tee fitting.
11. Install the 90° end of the supplied hydraulic hose (P/N 214-1000-659) on the 90° end of the installed tee fitting.
12. Connect the straight end of the installed hydraulic hose to Port B of the SmarTrax valve (P/N 334-0003-088).

HYDRAULIC SYSTEM DIAGRAM

Before SmarTrax Installation

After SmarTrax Installation

CHAPTER

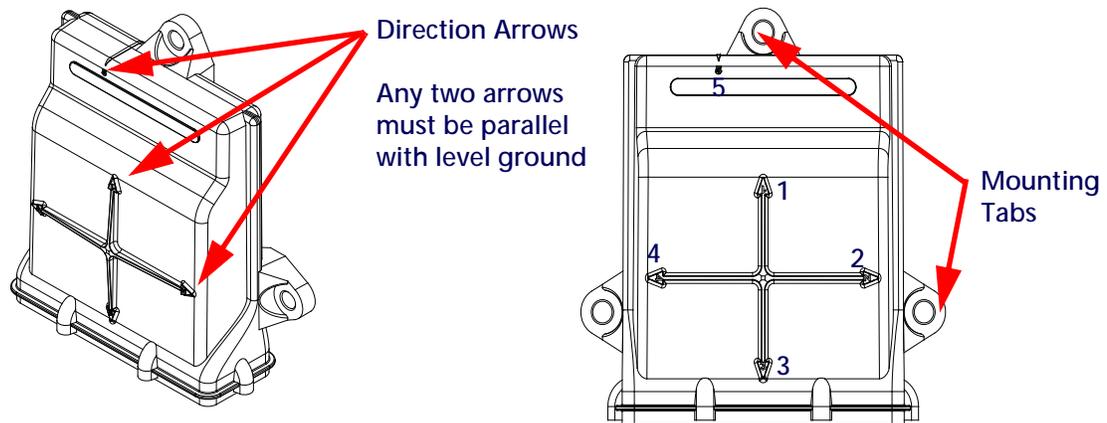

4

CAB COMPONENT INSTALLATION

INSTALL THE SMARTRAX NODE

NODE MOUNTING LOCATIONS

FIGURE 1. Node Mounting

When choosing the location for the SmarTrax node, consider the following points:

- Mount the SmarTrax node inside the machine's cab on a flat, level surface for proper performance and cable connection.
- One of the six numbered direction arrows on the node must be oriented in the direction of forward vehicle travel, one arrow pointing straight up, and two of the arrows parallel to the ground.

NOTE: Make a note of the number of the arrow that is oriented in the direction of forward vehicle travel. This number will be needed during the SmarTrax calibration process.

- The node mounting location must not create tripping hazards.
- Mount the node in a location where it will not be kicked or jarred during normal equipment operation.
- The location must allow cable routing to avoid crimping or damaging the cables or the node connections.
- Securely fasten the node using bolts or screws through at least two of the three mounting holes. When mounted properly, the node should not become loose or rotate.

INSTALL THE SMARTRAX NODE - PREFERRED MOUNTING METHOD

FIGURE 2. Instructional Seat Mounting Screws

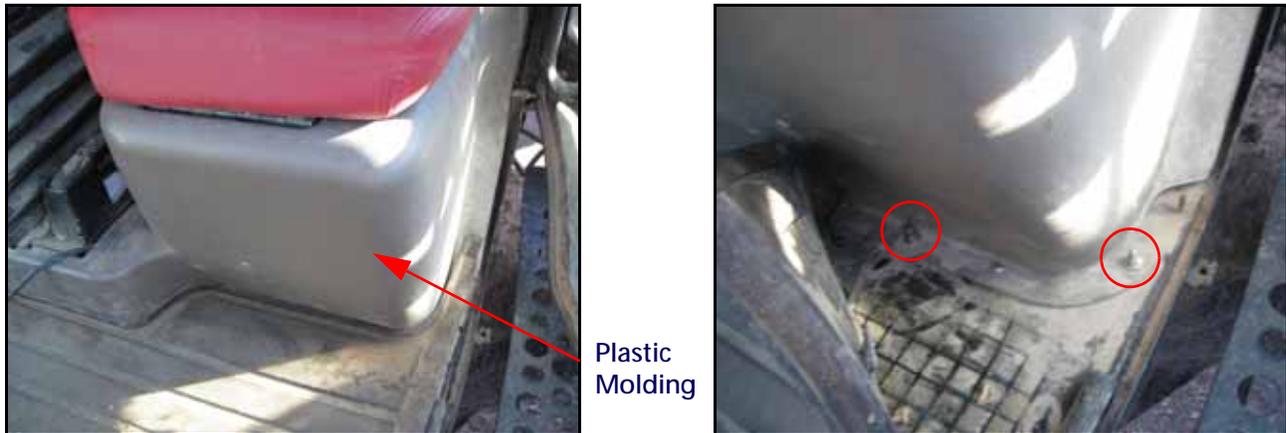

1. Uninstall the instructional seat cushion by removing the screws that secure it to the frame.
2. Remove any contents from under the instructional seat.

FIGURE 3. Floor Mat Removed from Cab

3. Lift the floor mat from the floor in front of the seat.

FIGURE 4. Removing Instructional Seat Molding

4. Remove the plastic molding under the instructional seat by removing the nuts and bolts securing it.

FIGURE 5. Node Mounted to Mounting Plate

5. Mount the SmarTrax node (P/N 063-0173-228) to the node mounting bracket (P/N 107-0172-084) using three 3/8"-16 zinc flanged lock nuts (P/N 312-1001-164).
6. Place the node in the instructional seat compartment so the connectors face away from the operator's seat.
7. Secure the node mounting bracket to the existing bolts in the floor of the cab using four 1/4" zinc split lock washers (P/N 313-1000-016), four washers (P/N 313-2300-009), and four M6 lock nuts (P/N 312-4000-207).

FIGURE 6. Node Harness Installed on Node

8. Install the two large, rectangular connectors of the node cable (P/N 115-4001-191) into the correct ports of the node, tightening the bolts on the harness connectors to secure the connections.

NOTE: The connectors should be facing the window.

9. Locate the ENABLE connector on the node harness and connect it to the foot switch cable connector.
10. Route the node cable into the fuse box and behind the operator's seat.
11. Connect the DGPS connector to the GPS receiver.

FIGURE 7. DGPS OUT Connector Routed Under Operator's Seat

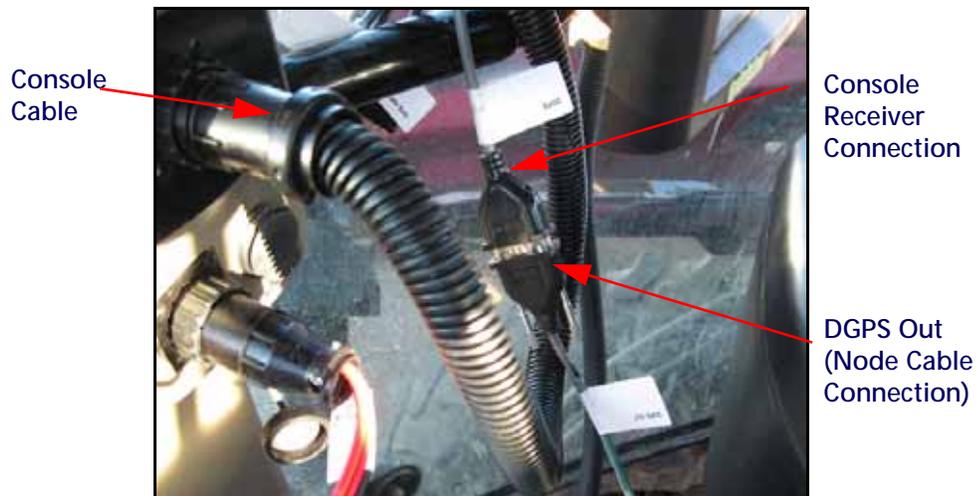

12. Route the DGPS OUT connector out the right corner of the operator's seat base and under the right arm rest.

FIGURE 8. Convenience Tray Removed

13. Remove the convenience tray from the right-rear corner of the cab.
14. Locate the POWER GND PORT on the machine's harness in the convenience tray compartment.
15. Connect the machine's POWER GND PORT connector to the mating 6-pin POWER connector on the node harness.
16. Connect the node cable's CAN connector to the CAN Adapter Cable (P/N 115-4001-248).
17. Locate and disconnect the machine's green 12-Pin AUTOGUIDANCE INTERFACE connections from under the instructional seat.
18. Install the CAN adapter cable between the green connectors.

FIGURE 9. DGPS OUT Connected to Console Receiver Connection

19. Connect the DGPS connector on the node harness to the GPS receiver.
20. Route the DGPS OUT connector on the node harness to the A-post at the front-right corner of the cab.
21. Connect the DGPS OUT connector to the Viper Pro or Envizio Pro receiver connection.

MOUNT THE SMARTRAX NODE - SECONDARY MOUNTING METHOD

FIGURE 10. Node Mounting Location

1. Identify the node mounting location on the bracket right side of the operator's seat.
2. Remove the existing nut, bolt, and spacer from the bracket that holds the machine's traction control foot pedal in place.

FIGURE 11. Hole Drilled in Machine's Bracket

3. Align the hole in the node mounting bracket (P/N 107-0171-954) with the hole in the machine's bracket.
4. Using the node mounting bracket as a template, drill a second hole in the machine's bracket.

FIGURE 12. Node Mounting Bracket Installed

5. Reinstall the machine's spacer between the traction control pedal and the machine's bracket.
6. Secure the node mounting bracket to the machine's bracket using two 1/4"-20 x 1-1/4" hex bolts (P/N 311-0050-106), two 1/4" flat washers (P/N 313-2300-009), and two 1/4"-20 nylon insert lock nuts (P/N 312-4000-057).

FIGURE 13. Node Installed on Mounting Bracket

7. Align the holes in the node with the holes in the node mounting bracket.
8. Install two 5/16"-18 x 7/8" hex bolts (P/N 311-0052-104) and two 5/16" zinc flanged lock nuts (P/N 312-1001-169) in the top and right node mounting tabs.

FIGURE 14. Node Support Bracket Secured to Node Mounting Bracket

9. Position the node support bracket (P/N 107-0171-960) so that the hole aligns with the hole in the bottom node mounting tab.
10. Secure the node support bracket to the node mounting bracket by inserting a 5/16"-18 x 7/8" hex bolt (P/N 311-0052-104) through both brackets and installing one 5/16" zinc flanged lock nut (P/N 312-1001-169).

FIGURE 15. Node Support Bracket Secured to Cab Floor

11. Secure the node support bracket to the cab floor using one #10 x 3/4" self-tapping slotted hex head screw (P/N 311-0001-321).

FIGURE 16. Node Harness Installed on Node

1. Install the two large, rectangular connectors of the node harness (P/N 115-4001-191) into the correct ports of the node, tightening the bolts on the harness connectors to secure the connections.

FIGURE 17. Node Harness Routing

2. Route the node harness into the blower fan compartment located in the right-rear corner of the cab.

FIGURE 18. Convenience Tray Removed

3. Remove the convenience tray from the right-rear corner of the cab.

4. Locate the POWER GND PORT on the machine's harness in the convenience tray compartment.
5. Connect the machine's POWER GND PORT connector to the mating 6-pin POWER connector on the node harness.
6. Connect the node cable's CAN connector to the CAN Adapter Cable (P/N 115-4001-248).
7. Locate and disconnect the machine's green 12-Pin AUTOGUIDANCE INTERFACE connections from under the instructional seat.
8. Install the CAN adapter cable between the green connectors.

FIGURE 19. DGPS OUT Connected to Console Receiver Connection

9. Connect the DGPS connector on the node harness to the GPS receiver.
10. Route the DGPS OUT connector on the node harness to the A-post at the front-right corner of the cab.
11. Connect the DGPS OUT connector to the Viper Pro or Envizio Pro receiver connection.

INSTALL THE FOOT SWITCH

FIGURE 20. Foot Switch Installed

1. Select a suitable location for the foot switch (P/N 063-0172-470) to be installed.

NOTE: The foot switch should be installed in a location where the operator has easy access to it and is able to fully press the pedal.

2. Using the holes in the foot switch as a template, drill holes in the floor of the cab.
3. Secure the foot switch to the floor by installing the supplied screws in each of the mounting holes.
4. Locate the ENABLE connector on the node harness (P/N 115-4001-191) and connect it to the foot switch cable connector.

INSTALL THE VALVE HARNESS

FIGURE 21. Valve Cable Routed Through Access Point

1. Route the valve cable into the cab from the foam access point under the convenience tray on the right side of the seat.

FIGURE 22. Valve Harness Connected to Node Harness

2. Connect the rectangular 12-pin connector on the valve cable (P/N 115-4001-111) into the mating connection on the node harness (P/N 115-4001-191).

FIGURE 23. Valve Cable Connected to Flow Switch

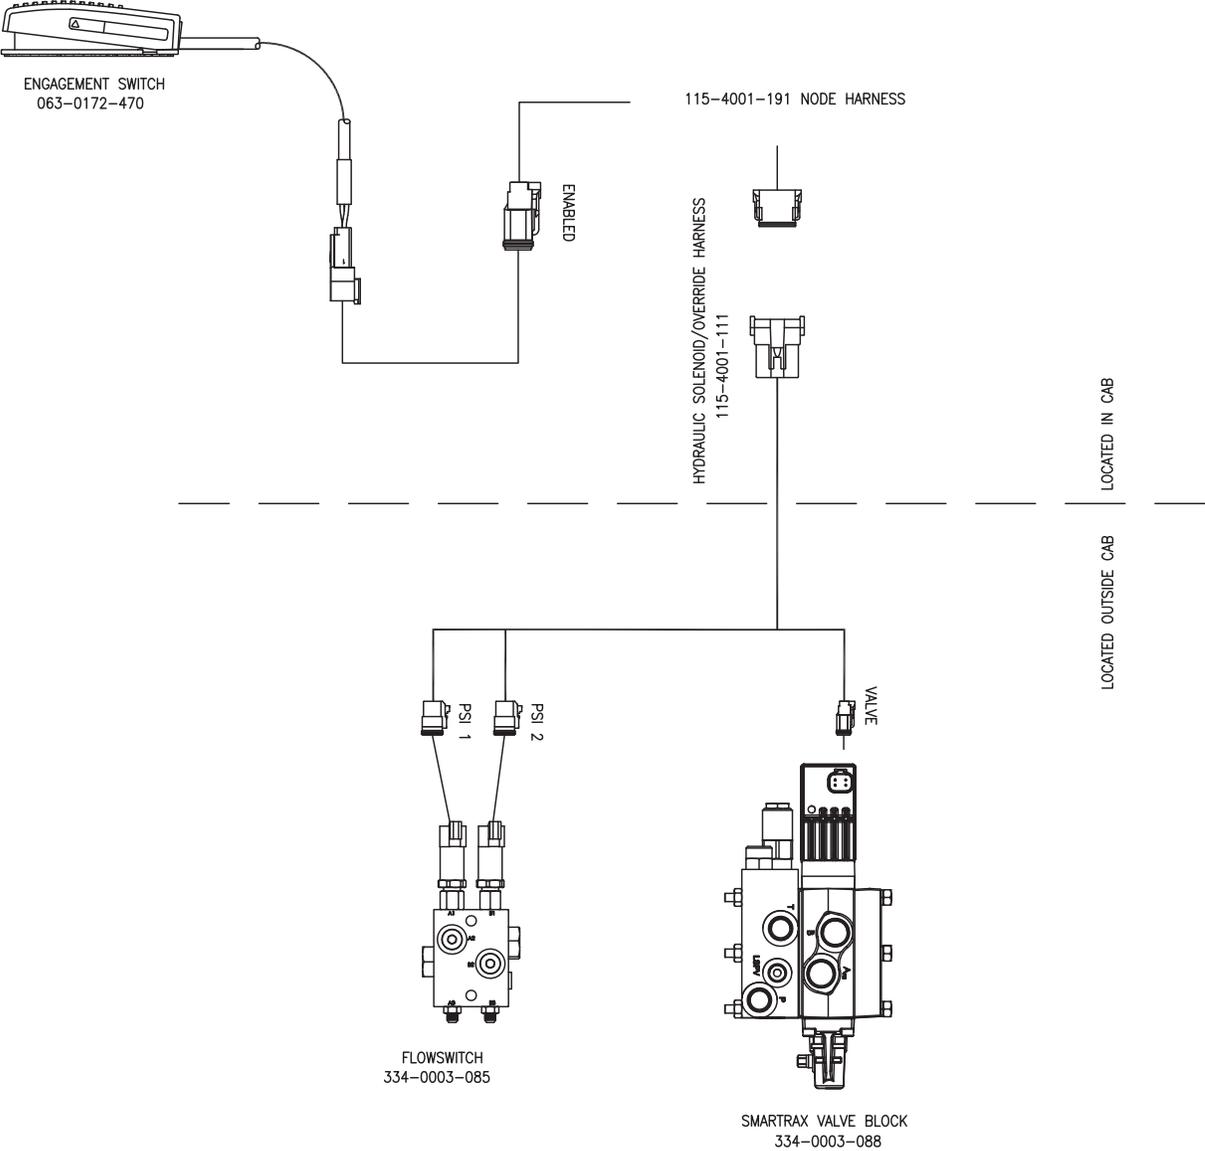

3. Plug the PS1 and PS2 connectors from the valve cable into the pressure transducers installed on the flow switch (P/N 334-0003-085).

NOTE: These connections can be plugged into either transducer.

4. Plug the VALVE connector from the valve cable into the open port at the end of the SmarTrax valve (P/N 334-0003-088).

WARNING

When starting the machine for the first time after installing SmarTrax, be sure that all persons stand clear in case a hose has not been properly tightened.

WARNING

Do not use hands to check for leaks. Hydraulic fluid under pressure can penetrate the skin and cause serious injury or death.

VERIFY THE SMARTRAX SYSTEM INSTALLATION

1. Turn on the machine.
2. Double-check all fitting and hose connections to ensure that:
 - Hoses are not rubbing on or interfering with moving parts.
 - Hydraulic fluid is not leaking from the system.
3. Turn the machine's wheels fully from side to side repeatedly to remove air from the hydraulic system.

NOTE: During the SmarTrax system installation, whenever the hydraulic system is purged for maintenance, or when fittings are loosened or disconnected, air is introduced into the lines of the hydraulic system. If air pockets are present, the wheels may not move consistently when the steering wheel is turned.

4. Continue turning the wheels until they move steadily and smoothly when the steering wheel is turned.
5. Access the System Diagnostic screen by selecting the MACHINE TEST option on the Machine Type screen and turn the wheels using the Raven field computer. The machine may need to be rolling forward to allow the wheels to turn left or right.

NOTE: If there are issues with the SmarTrax system, turn off the machine and correct them immediately. For additional assistance, refer to the SmarTrax Calibration & Operation Manual (P/N 016-0171-277) or contact your local Raven dealer.

CALIBRATE THE SMARTRAX SYSTEM

Refer to the SmarTrax Calibration & Operation Manual (P/N 016-0171-277) for instructions on calibrating the SmarTrax system, adjusting system settings, and system operation.

RAVEN

Limited Warranty

What Does this Warranty Cover?

This warranty covers all defects in workmanship or materials in your Raven Applied Technology Division product under normal use, maintenance, and service when used for intended purpose.

How Long is the Coverage Period?

Raven Applied Technology products are covered by this warranty for 12 months from the date of retail sale. In no case will the Limited Warranty period exceed 24 months from the date the product was issued by Raven Industries Applied Technology Division. This warranty coverage applies only to the original owner and is non-transferable.

How Can I Get Service?

Bring the defective part and proof of purchase to your Raven dealer. If the dealer approves the warranty claim, the dealer will process the claim and send it to Raven Industries for final approval. The freight cost to Raven Industries will be the customer's responsibility. The Return Materials Authorization (RMA) number must appear on the box and all documentation (including proof of purchase) must be included inside the box to be sent to Raven Industries.

What Will Raven Industries Do?

Upon confirmation of the warranty claim, Raven Industries will (at our discretion) repair or replace the defective product and pay for the standard return freight, regardless of the inbound shipping method. Expedited freight is available at the customer's expense.

What is not Covered by this Warranty?

Raven Industries will not assume any expense or liability for repairs made outside our facilities without written consent. Raven Industries is not responsible for damage to any associated equipment or products and will not be liable for loss of profit, labor, or other damages. The obligation of this warranty is in lieu of all other warranties, expressed or implied, and no person or organization is authorized to assume any liability for Raven Industries.

Damages caused by normal wear and tear, misuse, abuse, neglect, accident, or improper installation and maintenance are not covered by this warranty.

Extended Warranty

What Does this Warranty Cover?

This warranty covers all defects in workmanship or materials in your Raven Applied Technology Division product under normal use, maintenance, and service when used for intended purpose.

Do I Need to Register My Product to Qualify for the Extended Warranty?

Yes. Products/systems must be registered within 30 days of retail sale to receive coverage under the Extended Warranty. If the component does not have a serial tag, the kit it came in must be registered instead.

Where Can I Register My Product for the Extended Warranty?

To register, go online to www.ravenhelp.com and select Product Registration.

How Long is the Extended Warranty Coverage Period?

Raven Applied Technology products that have been registered online are covered for an additional 12 months beyond the Limited Warranty for a total coverage period of 24 months from the date of retail sale. In no case will the Extended Warranty period exceed 36 months from the date the product was issued by Raven Industries Applied Technology Division. This Extended Warranty coverage applies only to the original owner and is non-transferable.

How Can I Get Service?

Bring the defective part and proof of purchase to your Raven dealer. If the dealer approves the warranty claim, the dealer will process the claim and send it to Raven Industries for final approval. The freight cost to Raven Industries will be the customer's responsibility. The Return Materials Authorization (RMA) number must appear on the box and all documentation (including proof of purchase) must be included inside the box to be sent to Raven Industries. In addition, the words "Extended Warranty" must appear on the box and all documentation if the failure is between 12 and 24 months from the retail sale.

What Will Raven Industries Do?

Upon confirmation of the product's registration for the Extended Warranty and the claim itself, Raven Industries will (at our discretion) repair or replace the defective product and pay for the standard return freight, regardless of the inbound shipping method. Expedited freight is available at the customer's expense.

What is Not Covered by the Extended Warranty?

Raven Industries will not assume any expense or liability for repairs made outside our facilities without written consent. Raven Industries is not responsible for damage to any associated equipment or products and will not be liable for loss of profit, labor, or other damages. Cables, hoses, software enhancements, and remanufactured items are not covered by this Extended Warranty. The obligation of this warranty is in lieu of all other warranties, expressed or implied, and no person or organization is authorized to assume any liability for Raven Industries.

Damages caused by normal wear and tear, misuse, abuse, neglect, accident, or improper installation and maintenance are not covered by this warranty.
